

BY Developers FOR Developers

Storage Developer Conference
September 22-23, 2020

Tiered Storage Deployments with 24G SAS

Jeremiah Tussey
Vice President, SCSI Trade Association

Alliances Manager, Product Marketing
Microchip

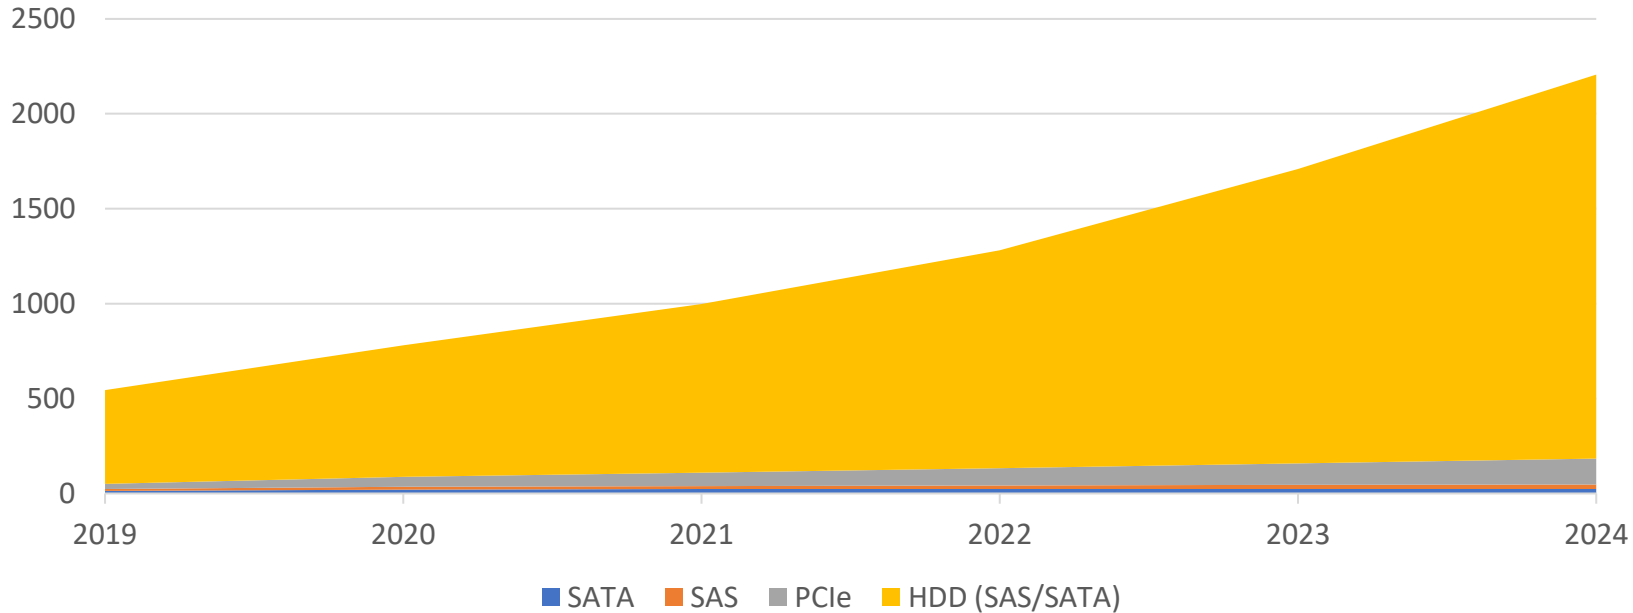

Agenda

- Enterprise Storage Market Update
- 24G SAS Enhancements
- Data Center Applications and Examples
- Storage Tiers Using 24G SAS
- Key Takeaways

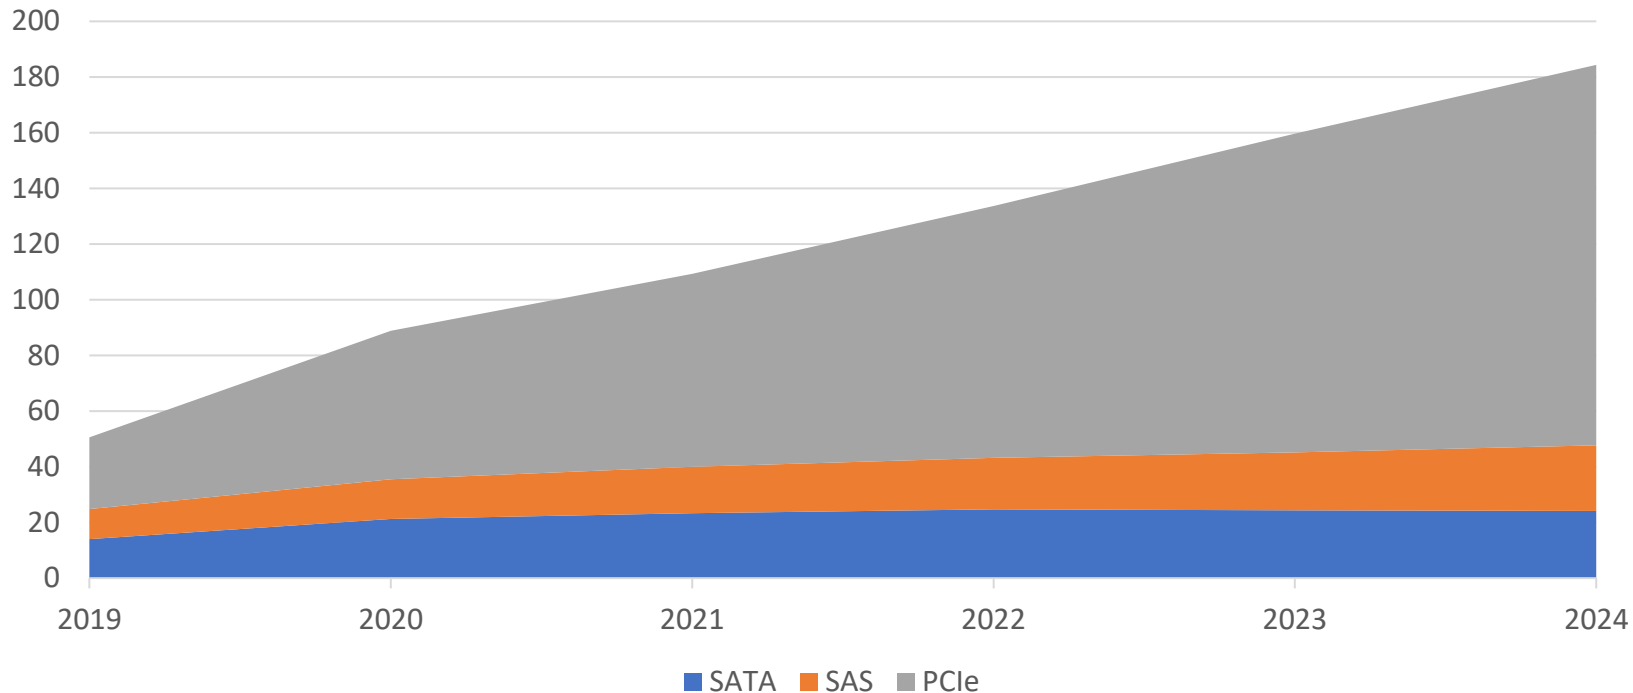

All Enterprise Storage Exabytes (2019-2024)

SAS Connected Storage Continues Strong Growth

SAS Intersects New Media Innovations

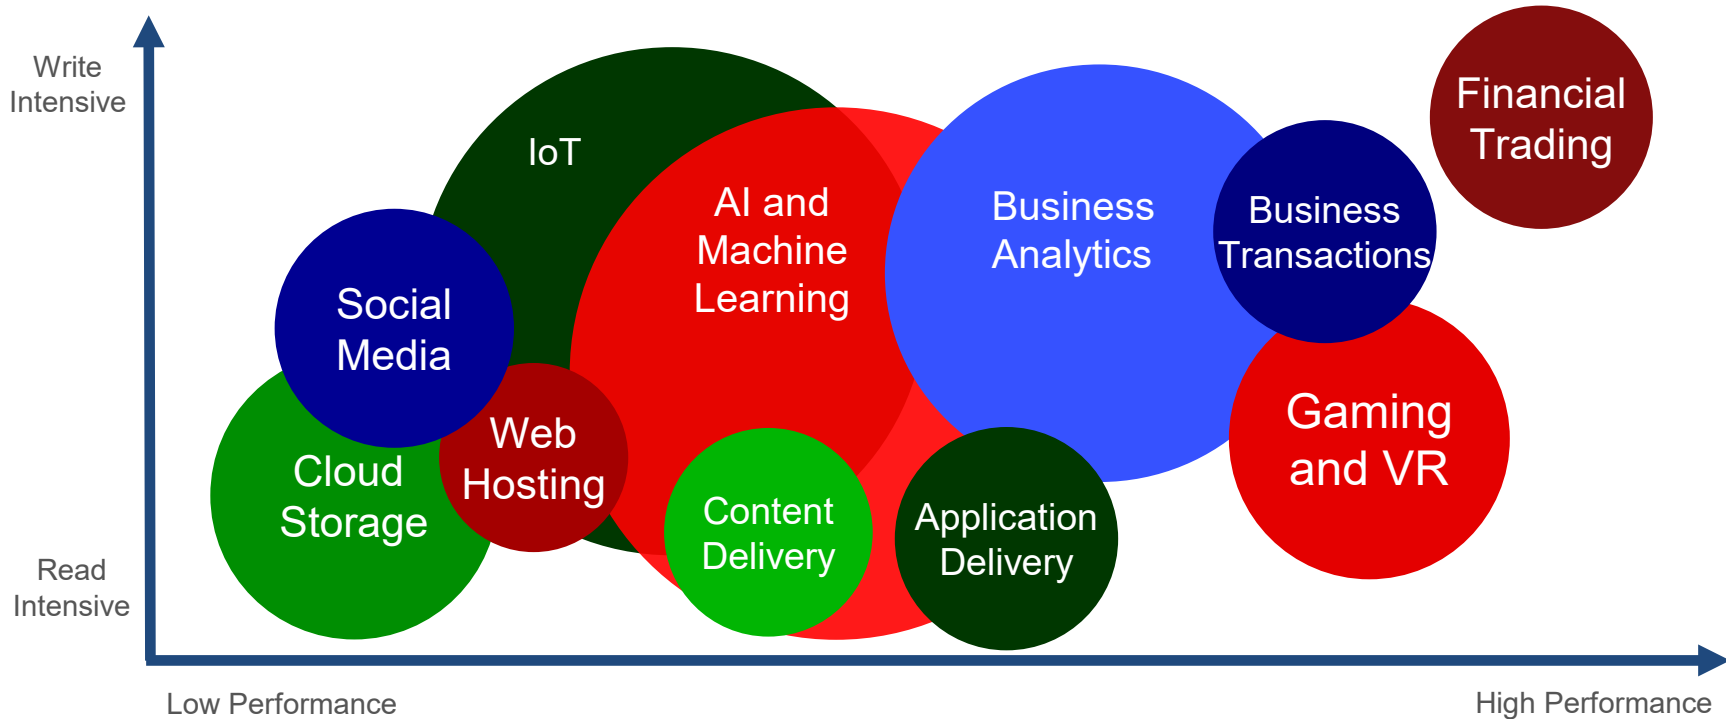

Storage media is ever-changing to increase IOPS and capacity and to provide lowest cost per GB

Innovation	Media	Focus	SAS's Role
MultiLink SAS™	HDD/SSD	Performance	Wide Device Connections
Storage Intelligence	SSD	Performance	Dedicated SSD Commands
TDMR (Two-Dimensional Magnetic Recording)	HDD	Faster Write Performance	HDD Connectivity
HAMR (Heat Assisted Magnetic Recording)	HDD	Capacity	HDD Connectivity
MAMR (Microwave Assisted Magnetic Recording)	HDD	Capacity	HDD Connectivity
SMR (Shingled Magnetic Recording)	HDD	Capacity	ZBC
HSMR (Hybrid Shingled Magnetic Recording)	HDD	Capacity	ZBC2
Multi-Actuator	HDD	Performance (IOPs/TB)	Multi LUN Connections
QLC (Quad-Level Cell) NAND	SSD	Capacity	ZBC

Specifications/Enhancements Timeline

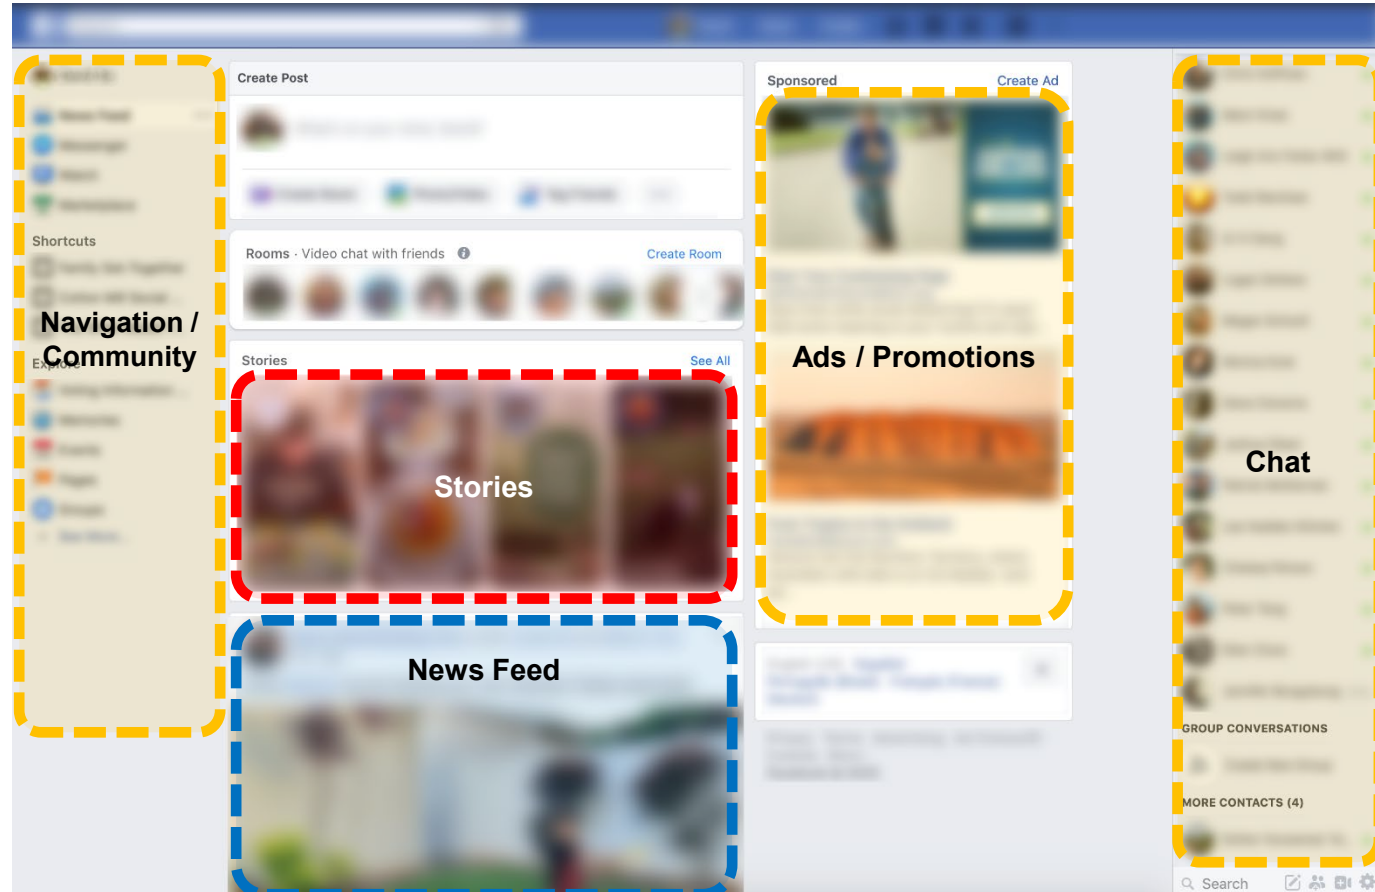

Data Center Storage Applications

Data Everywhere (and Every Way)

Social Media Example

Social Media Tiered Storage Example

	Function	HW Storage Support	Storage Cap/ Perf
Social Media Application	OS & Web Server	Mirrored Boot Volume	Low/ Low
	Database for User data	SAS HDD/SSD w/RAID	Medium/ High IOP
	Object Store	Lots of SATA devices	High/ Low
	Cache for Application & User Data	1 or 2 SSDs Lots of DDR	Low / High IOP
	And what about analytics? With a dataset of millions of users, what can we do??		

Cloud Storage Architecture

Scalable, Flexible Storage – Hot Tier

SAS SSDs
SATA SSDs

- Data center applications
 - Financial Trading
 - Gaming / VR
 - Business Transactions
 - AI and Machine Learning
- Storage requirements
 - Performance (IOPS)
- Features of 24G SAS that benefit this tier
 - Support for high-performance SAS and SATA SSDs
 - Cost-performance point (\$ / IOPS)

Scalable, Flexible Storage – Warm Tier

Cascaded JBODs (with SAS expanders) of Nearline SAS HDDs

- Data center applications
 - IoT
 - Business Analytics
 - Social Media
- Storage requirements
 - Scalability
 - Balance of capacity, performance, and cost
 - Redundancy
- Features of 24G SAS that benefit this tier
 - Dynamic scaling up to 64K devices
 - Support for high-performance SAS HDDs
 - Reliability: Multi-path fail-over, RAID

Scalable, Flexible Storage – Cold Tier

Cascaded JBODs (with SAS expanders) of SATA SMR HDDs

- Data center applications
 - Social Media
 - Cloud storage
 - IoT
- Storage requirements
 - Large-scale
 - Low power and low cost
 - High capacity (\$/GB)
- Features of 24G SAS that benefit this tier
 - Flexibility to support SATA HDDs
 - Dynamic scaling up to 64K devices
 - Rack-level and data-center level reach

24G SAS Ecosystem Readiness in 2020

- Ecosystem is on track for SAS-4 production readiness in 2020
 - SAS-4 analyzers have been sampling since last year

- Cables and connectors: both existing and new form-factors ready for 24G SAS

Mini SAS HD

SAS MiniLink

SlimSAS

- SAS-4 controllers and expanders aligned with upcoming Gen4 platform launches
- New HDD/SSD capabilities to intersect with 24G SAS ecosystem
 - MultiLink SSDs
 - Multi-Actuator
 - Hybrid SMR
 - HAMR / MAMR

Key Takeaways

- 24G SAS addresses the accelerating demand for storage
- SAS continues to innovate around the reliability of storage
- SAS architecture is optimized for scalable, flexible deployments, serviced by tiers of storage
- SAS is ubiquitous and is not going away anytime soon
- 24G SAS components are available today, with more to be announced

Thank You!
