

# Introduction to the Summit – Day 2

Presented by David McIntyre  
SNIA CMS Summit Chair

 **COMPUTE, MEMORY,  
AND STORAGE SUMMIT**

*Solutions, Architectures, and Community*  
VIRTUAL EVENT, MAY 21-22, 2024

# Wednesday's Sessions Include These Topics:

- **Artificial Intelligence**

- How ethernet is powering AI futures
- Generative AI data architectures
- Proprietary interconnects with AI

- **Compute**

- Pushing infrastructure boundaries
- Computational storage strategies for AI

- **Memory**

- Smart Data Accelerator Interface use cases
- Memory vision for real world applications

- **Security**

- Security and privacy concerns for AI
- How to adopt the zero-trust paradigm

Engage with our speakers and fellow attendees on the Summit slack channels!

**And many more great sessions and speakers!**

Please take a moment  
to rate this session.

Your feedback is important to us.
